

Baltic Birch

A Quality Performer for any Application.

Baltic Birch plywood is one of the most versatile hardwood plywood options available. With nearly a void-free core, 100% Birch inner-plyes and more plies than traditional domestic plywood, Baltic Birch panels are extremely stable, strong and perform exceptionally well. Canusa is proud to be an Authorized Distributor of Sveza in North America.

12mm B/B

For full specifications and grading information see Product Specifications PDF.

Features

Benefits

Virtually void-free core

Edges are aesthetically pleasing

Birch veneers throughout panel

Balanced and strong core

Optional exterior glue

Moisture resistant
